PROJECTS

Academic & Administrative System ↗

Academic and Administrative System (MERN Full Stack Project) Developed a comprehensive web-based platform to streamline academic and administrative tasks for educational institutions using the MERN (MongoDB, Express.js, React, Node.js) stack. The system enables administrators, faculty, and students to efficiently manage academic records, streamline workflows, and ensure data accuracy.

AI Embedded Medical Diagnosis ↗

Developed an intelligent web application that leverages AI and Natural Language Processing (NLP) to predict possible diseases based on user-entered symptoms and recommend specialized doctors for consultation. The platform aims to provide an accessible, preliminary health assessment tool for users, helping them make informed medical decisions.

SKILLS

- JavaScript
- Python
- React
- MongoDB
- HTML
- MySQL
- Node.js
- C Programming
- PHP
- Express.js

ADDITIONAL DETAILS

- Secured 3rd rank in Skill Fare conducted by the George Telegraph in the field of computer application by creating an AI medical diagnosis website.
